Day: **M T W T F S**

(ii)

What are innovative partnerships?

Ans: An innovative partnership is a platform, organization, or individual in which several companies work toward mutual interests to solve existing market problems.

(iii)

Business Case and Project Justification:

Business Case: provides justification for undertaking a project, program or portfolio - It also provide and evaluate the benefit, cost and risk.

Project Justification: is about trying to explain why we need to implement a particular solution to the problem that occurs.

(iii)

Theory W: was developed by Boehm.

Theory W demonstrates that software project managers primary objective is to ensure that all stakeholders are winners in a software process.

PERT and CPM:

PERT: PERT stands for program evaluation review technique. A PERT chart is a

project management tool that provides a graphical representation of project's timeline.

CPM: stands for critical path method, is an algorithm for scheduling a set of project activities.

(v)

Network Analysis: is a system which plans the project by analyzing the project activities. Project's are broken down into individual tasks or activities, which are arranged in logical sequence.

(vi)

Predictive measure/metrics: ~~measures~~ ^{are} the processes or behaviour that measures the progress of the goal. For each initiative, the project team will identify one measurable parameter as best indicator of progress.
